

What is This?

The Foundation for the Law of Time is a planetary organization committed to the replacement of the irregular standard of the the Gregorian calendar with the regular standard of the thirteen moon, 28 day calendar. The deadline for this, long overdue calendar change is July 24, 2004.

How Can I Learn More?

Here are some tutorials to get you started.

1. **[Why Should I Change My Calendar?](#)** Brief explanation of what's wrong with the current global standard for measuring time.
2. **[Time as a Frequency](#)**. Time is not a line or an arrow, time is a frequency.
3. **[Multimedia](#)**. Radio interviews, music inspired by the New Time, television interview done for Argentina, the Day Out of Time festivities in Portland. You can learn allot listening to these archives.
4. **[NEW!! 13 Moon Self Study Pilot Program](#)**

This program of study is a set of introductory considerations into the amazing new World of Time...

Easy and a quick read...

DOWNLOAD NOW!

So Where Can I Get a Calendar?

You can **[download a thirteen moon calendar](#)** and **[introductory information](#)** right from this website. If you would rather have a calendar mailed to you, or would like printed material you can **[do](#)**

Congratulations for the discovery of 13 moon calendar!!!

- Tenzin Dorjee.
Kathmandu Nepal

When the inspector of the Minister of education arrived he asked what the secret of the success of the school was the teacher responded, "surely it is because everyone here knows their galactic signature." The inspector looked suprised and asked the director of the school who confirmed this statement saying, "Yes, I am a yellow Warrior, for example."

...The environment of the country is such that the best way to survive is to return to spirituality.

The people understand that spirituality is a question of existence.

This is why for many people the information of the Dreamspell and the Law of Time was the piece of the spiritual puzzle they were missing.

- Katarina Prokic.
Planet Art Network Yugoslavia

[that here,](#)

I heard someone call themselves a White Solar Wizard, why did they say that?

They knew their *kin*, Everyone is born on a particular day of the thirteen moon calendar. The Mayans called this day a Kin. You can [find yours here.](#)

And if you still want to browse some more:

Universal Religion - For there to be peace on earth, a re-evaluation of the three cosmopolitan religions: Buddhism, Christianity, and Islam is needed.

Earth Celebrations: Mainstreaming the Planet. Very good interview of José Arguëlles from 1989. Learn about Harmonic Convergence.

Banner of Peace. The Foundation for the Law of Time promotes and supports the Roerich Peace Pact and Banner of Peace, an international treaty and law signed in 1935.

Legend of Turtle Island. Tortuga means turtle in Spanish. Native American story of why the Americas is called Turtle Island.

Archives. Tortuga.com has hundreds of pages, you can use this page as a portal to browse through them.

More questions? You can write at foundation@tortuga.com

13 Moon Calendar Tutorial

Basic Tutorial:

formatted to be
printed on paper.

Part One. Part Two.

Gives a very good
introduction to the
thirteen moon
calendar and prints
nicely on two
pages.

Did You Know...

... **In one year the moon circles the earth 13 times?**

... In the current global standard calendar, a
month doesn't correspond to one natural cycle?

... The word "**calendar**" comes from the Roman word,
"**Calends**", which was the name of the account book,
the book recording monthly debts and bills to be paid?

... **Time isn't money?**

... September means seven, but is the ninth month?

... March is named for Mars, the Roman God of War?

... July and August are named for Julius and Augustus Caesar?

**If today is Monday, June 1st,
what day of the week will July 1st be?**

.... and August 1st?

..... what about November 1st?

If you were to build a house, wouldn't you use a ruler of equal measure?

The current twelve month calendar is made of months of unequal measure:

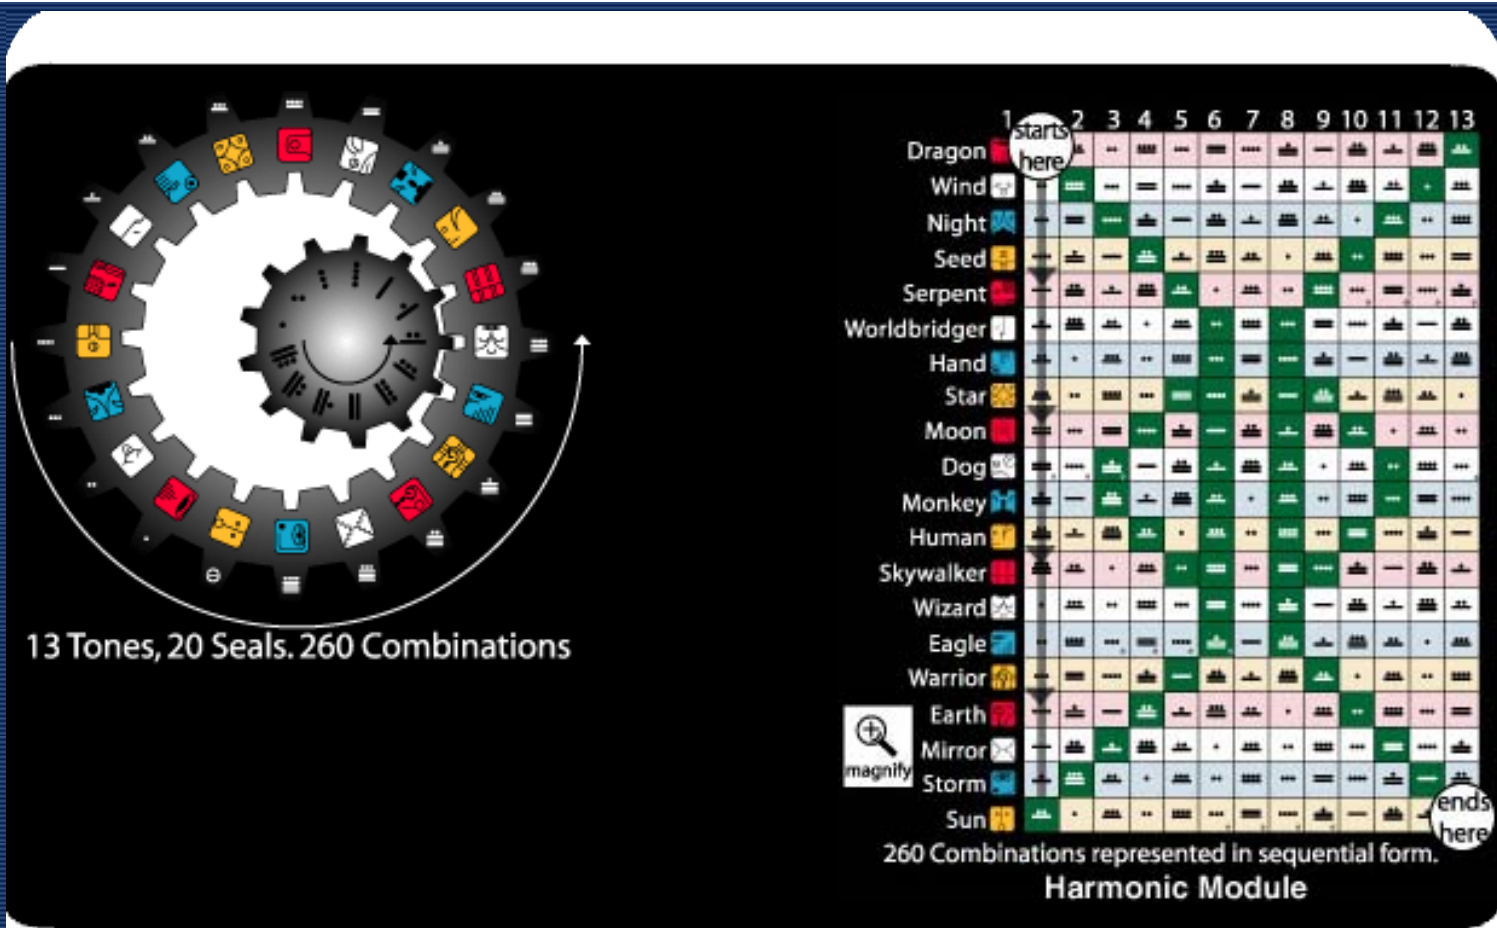

31 days is followed by 28 or 29 days, then 31 days, 30 days, 31 days, 30 days, 31 days,
31 days, 30 days and 31 days.

Current Twelve Month Calendar. Months have unequal units of measure.

[next >>](#)

<< [back](#) :: [home](#) <<

Time is not a line nor an arrow.

Time is a frequency - the frequency of synchronicity.

The thirteen moon calendar is truly unique because it is synchronized with the Harmonic Module, the universal 13:20 timing frequency.

This tutorial will show you how.

Originally used by the Maya, the most sophisticated timekeepers ever known, the Harmonic Module consists of 20 icons or **Solar Seals** and thirteen **Galactic Tones**, 1-13.

The resulting 260 permutations combined with the perfect harmony of the thirteen moon calendar give each day a unique quality.

13 MOON - SELF STUDY PILOT PROGRAM

Preparing for the Great Calendar Change of 2004

Premise: To Declare the End of Time and Shift from Fear to Love, Change the Calendar!

Premise: To accept the 13 moon calendar is a positive, concrete act demonstrating the move from fear to love, from chaos to harmony, from war to peace. The end of time is the end of the old time of violence and separation encoded in an irregular and chaotic calendar. The New Time of Peace and harmony emerges as light embedded in a perpetual calendar that is a reflection of Eternity. For more than 150 years this change has been deliberated. Now the cycle is closing.

The closing of the cycle means the reintegration of the human consciousness into the solar ring through the application of the correct standard of measure. Whether humans are aware of it or not the Earth goes around the sun and it makes a solar ring with each orbit. With the accurate measure of the 13 moons each with 28 days the solar ring can be made conscious. If we make this simple adjustment of following the Thirteen Moon calendar, then in one year our consciousness will bring the orbital solar frequencies into proper alignment with the human mind. This precipitates heightened awareness or consciousness that has not previously been known.

When history began in Babylonia, Sumeria and the Middle East it forfeited knowledge of the solar ring for a focus on the synodic lunar calendar which has nothing to do with the solar ring. When the conquest of the New World happened, the Babylonians destroyed the knowledge of the calendar which contained knowledge of the solar orbit. By destroying this knowledge they also destroyed the basis of cosmic perceptions - this is the root of the calendar change and the closing of the cycle. Keep in mind that the destruction of Mayan time knowledge was completed by a Vatican calendar reform in 1582 which gave us the (Gregorian) calendar we use today.

The 13 Moon/28-day calendar is the salvation of planet Earth because it is a cosmic mechanism that creates a frequency which matches the solar frequency. Attuning to this solar frequency will result in an amping of consciousness - this is the evolutionary trip switch.

The following program of study is merely a set of introductory considerations into the amazing new world of time, a world you hardly suspected existed!

There are several levels of understanding.

LEVEL A

- 1. How a Calendar Effects Reality: Why We Need to Change**
(Don't you think it's time to reformulate the human mind?)
- 2. 13 Moon 28-day Calendar: A Fresh View**
(Ready for galactic mind expansion?)
- 3. Familiarizing Yourself in the New Time**
(Puts unconscious programs into reverse gear)
- 4. Benefits of the New Calendar.**
(Roll out the rainbow carpet!)

LEVEL B

- 1. The 13-Moon Calendar and the Law of Time**
(Redefining reality)
- 2. The 13 Moon Calendar and the Tzolkin**
(Your ticket to the Fourth Dimension)
- 3. Finding your Galactic Signature and Defining the Dreamspell**
(The Key to your galactic mission)
- 4. The Wavespell of Time**
(13 stages of creation)

LEVEL C

After the Calendar Change-The Rainbow Bridge, Telepathy and Time Travel

Level A.

1. How a Calendar Effects Reality: Why We Need to Change

- Following the 13 moon/28 day calendar is the complete reformulation of the human mind. Only by reformulating the human mind will the next evolutionary step occur. We are the seedbed for the reformulation of the mind.
- Many times when new information comes to us that we don't understand, we stop paying attention to it because we are focusing on what we didn't understand. Your life and the world looks like what it does today because you have been concentrating on certain forms. The fact is that the Gregorian calendar and the mechanical clock are the foundational forms that we as a human species have been concentrating on.
- The Gregorian calendar currently in use worldwide has units of measure that correspond to no natural cycles. It is an irregular order. Its month lengths vary anywhere from 28 to 31 days.
- What the calendar does to the mind is so profound that to fully come to terms with it is to re-envision the very foundation of human life and thought.
- When you run your life according to the Gregorian calendar and mechanical clock without questioning where they came from and why you use them, then you are running on an "unconscious program." But you couldn't know this until you were told about it - which may be just this instant. If this is true, then congratulations - this could be the first step in taking back your own time.
- Keep in mind a calendar is a programming device, one of the enduring signs of human culture. As a programming device, the calendar is the major instrument giving the society that uses it its total look and feel.
- Any standard of measure that is irregular, flawed and systematically improbable when used over any period of time will produce corrupt or crooked thinking. Just think about the billions of humans who organize their lives according to the erroneous Gregorian calendar and mechanical clock. The fact is that almost the entire planet is running on an unconscious program!

- What is called global society is a consensus reality driven by an unconscious, irregular, artificial timing frequency called 12:60 - 12 month calendar and 60 minute hour. Where does the clock come from?
- When the clock was first created it was nothing but a toy. Then it was developed by some monks to amuse themselves and to wake up for early morning prayer-- then people decided to take it seriously and run their lives by a machine toy. And they are still doing it!
- What happens when we run our lives according to machines? This is weird.
- Keep this in mind: "The issue of the nature of time, or of the times in which we are living cannot be separated from the issue of the calendar." Hopefully it will not take nuclear war to dispose the human mind to think about this.
- Remember: Who owns your time owns your mind. Change your time and you change your mind. Change your mind and you change your world.

2. The Thirteen Moon, 28-day Calendar: A Fresh View

- There is a whole new reality awaiting you. Yes, you! In fact, this new reality is your natural birthright. The entry ticket into this new reality is the Thirteen Moon/28-day calendar.
 - Many of us think of time as chronology or a schedule for keeping accounts or recording holidays with little comprehension at all of the synchronic nature or order of time. The ultimate purpose of a calendar is not to keep accounts--but to synchronize!
 - The Thirteen Moon/28-day calendar is actually a standard of measure of Earth's solar ring- its solar orbit. Attuning to this solar ring through the harmonic calendar is the basis for developing higher cosmic perception.
 - Entering into the Thirteen Moon calendar is like learning a new language. To learn a new language you have to clear your mind of your native language and allow new thoughts and vocabulary to enter your head. It's really very simple if you see it as such.
 - The seed of the Thirteen Moon calendar was planted by the Mayan culture. The knowledge of the Mayan time masters surpassed all knowledge. True understanding of time causes our mind to expand and evolve.
 - The Thirteen Moon calendar is a universal reflection of perfect harmony primordially appearing in virtually all human cultures - Druid, Egyptian, Chinese, Inca, and Mayan, to name a few.
 - This calendar is a function of the natural Law of Time. The Law of Time says energy factored by time equals art. $T(E) = Art!!$
 - The Law of Time has functioned since the beginning of time. It has been previously unconscious - but is now being made conscious through you!
 - It all begins by following the path of the Thirteen Moons.
-

Stop and think about it. A calendar is a programming device, right? Well, look at who programmed this calendar and for what reasons:

More than 2000 years ago, Julius Caesar came up with the idea to gain more power and to change the Republic into an Empire. The result was the Julian calendar. In 1582 Pope Gregory XIII “reformed” the Julian calendar to give the conquered Indigenous people a new time. History is the script written by those who hold the power.

So let's look at that new calendar and then create some cosmic history ourselves!

Please note: July 26, 2004, Blue Crystal Storm is the interdimensional portal of time to make that change. So we've got some learning to do and people to get ready!

3. Familiarizing Yourself In the New Time

Dali Seli Gamma Kali Alpha Limi Silio

| | | | | | | |
|----|----|----|----|----|----|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| 15 | 16 | 17 | 18 | 19 | 20 | 21 |
| 22 | 23 | 24 | 25 | 26 | 27 | 28 |

- This simple schematic sums up the new calendar. Every Moon (month) is exactly the same. Days of the month and days of the week are perfectly harmonized. Every month starts on a Sunday and ends on a Saturday
- This is what we mean by harmonic standard. Many implications!
- Days of the week, Sunday-Saturday, are loaded with ancient karma, so they are being replaced by new names which refer to seven radial plasmas -electronic building blocks of Creation. Each plasma is associated with an action:

Sunday = Dali targets
Monday = Seli flows
Tuesday = Gamma pacifies
Wednesday = Kali establishes
Thursday = Alpha releases
Friday =Limi purifies
Saturday = Silio discharges

The names of the thirteen perfectly equal moons (think of justice and equality for all!) follow what is called a "thirteen tone cosmology of time," and each has an action quality and a totem animal:

Moon one = Magnetic Bat Moon of Purpose (July 26 - August 21)
Moon two = Lunar Scorpion Moon of Challenge(August 22 -September 19)
Moon three = Electric Deer Moon of Service (September 20- October 18)
Moon four = Self-existing Owl Moon of Form (October 19 - November 14)
Moon five = Overtone Peacock Moon of Radiance (November 15 - December 12)
Moon six = Rhythmic Lizard Moon of Equality (December 13 - January 9)
Moon seven = Resonant Monkey Moon of Attunement (January 10 - February 6)
Moon eight = Galactic Hawk Moon of Integrity (February 7- March 6)
Moon nine = Solar Jaguar Moon of Intention (March 7-April 3)
Moon ten = Planetary Dog Moon of Manifestation (April 4-May 1)
Moon eleven = Spectral Serpent Moon of Liberation (May 2-May 29)
Moon twelve = Crystal Rabbit Moon of Cooperation (May 31-June 26)
Moon thirteen = Cosmic Turtle Moon of Presence (June 27-July 24)

- The Thirteen Moons with four perfect weeks each account for the 52 weeks a year. $13 \times 28 = 364$ the 365th day is the

Day Out of Time (corresponds to old July 25).

- This day is no day of the week or month at all. A true freedom day for the forgiveness of debts and the celebration of Time is Art.
- There is no other calendar that even comes close in elegance and harmonic simplicity to the Thirteen Moon calendar. That is why it has been the choice calendar in the annals of calendar reform, from Benjamin Franklin to Eastman Kodak.
- Personal ease of calculating days and weeks will reap enormous everyday benefits, because the time that is freed up will bring about greater joy and harmony!
- It is called a moon calendar because the 28 day cycle is the female menstruation cycle, and it is the average between the synodical lunar cycle 29.5 days - new moon to new moon - and the sidereal cycle 27.1 days - place in the sky where the moon returns. The world's lunar calendars are synodical and have only 12 months and 354 days a year, though there are actually thirteen lunations a year.
- The Thirteen Moon calendar is only meant to replace the Gregorian as the world civil standard. All other calendars as well as all astronomical cycles are easily synchronized through the perfect pattern of the 13 moon 28-day cycle.
- Use the calendar as you do the old one. Note the ease with which you can make day date calculations. When you begin your annual planning according to this calendar, as well as managing your moon-thly budget, see how regular and easy it could be!
- Assignment: Find your Thirteen Moon birthday. Know its Moon date and day of week. Now take out your Thirteen Moon Calendar, and locate the information you need:
 - Step 1: Use the Gregorian calendar dates beneath the Names of the Moons to locate your Birth Moon.
 - Step 2: In that Moon, find the correlate Gregorian date on which your birthday falls.
 - Step 3: Note the Moon date and day of the week. Your birthday will always be the same day of the week every year! No way can you get lost in time again!

4. Benefits of the New Calendar

- Use of the Thirteen Moon calendar will change your perception of the world and thus change the world through your perception. That is because its perpetual harmony is coordinated by the synchronic order.
- All you have to do to learn the synchronic order is to pay attention.
- The synchronic order is the order of reality organized by time. It is synchronic because *everything* is synchronized! All there is is synchronicity!
- The synchronic order is like opening up a new window so that life can be reorganized through us by a higher command.
- Use of the Thirteen Moon calendar will not only attune you to nature but also help you see all aspects of your life through a different lens.
- Follow the Thirteen moon calendar faithfully for 28 days and note what inner changes occur and what new perceptions about reality spring about.
- Within 52 weeks (one year) of using the 13-Moon calendar you will advance in intelligence and knowing ultimately to the stage of telepathic knowing free of artificial contrivances.
- You will become increasingly conscious about the patterns of your life. As with anything in life, the more energy you put in the more you reap the benefits of, in this case, galactic vision. Galactic because time is not a local thing. It's the universal medium of synchronicity.
- By living by the synchronic order you can begin to put together the larger pieces of your life.
- By making conscious the patterns in our life we can see how a calendar affects our mind.

Is it not time to dispel our fear and let ourselves be merged into the pattern that connects us directly with galactic being?

Program B

1. The Thirteen Moon calendar and the Law of Time

- The 13-moon calendar and the Law of Time open the door to the next stage of evolution.
- The Law of Time is a whole system knowledge, which means it is both intuitive and logical and proceeds from the premise that the whole is in the part and that the part is in the whole.
- The Law of Time makes conscious what was unconscious. Humanity has been unconscious of the effects of an irregular calendar and of the mechanization of time. The Law of Time sheds light on these matters and offers a solution.
- The 13-Moon calendar is the practical application of the Law of Time. The Calendar Change will make everyone conscious of time.
- Though rooted in the time knowledge of the ancient Maya, and precisely because of that, the Law of Time is the revelation that is intended to close the cycle of history (2012) with a knowledge that has been intuitive and largely dormant until this moment.
- Time is not only a measure of cycles but also the universal factor of synchronization. The chief pragmatic instrument of the Law of Time is the 13 Moon calendar.
- On the foundation of the 13 Moon calendar, the Law of Time, systematically establishes levels of synchronization and knowledge. The Law of Time also differentiates between the artificial 12:60 timing frequency, which drives all of modern civilization, and the natural universal timing frequency 13:20.
- From this follows an evolved understanding of cyclic time, the synchronic order and levels of fourth dimensional knowledge - all of which revolve about one point: conforming to a correct and mathematical order in time - the 13 moon calendar.

- The Law of Time makes it possible for a critical mass of humans to precipitate and participate in this time phase shift. The time phase shift is like pushing the fast forward button to a space where Earth has already cleared itself of the distorting vibrations of the erroneous 12:60 timing frequency.
- Phase shift: A radical displacement of the Earth into the future through a process of teleportation. The Earth is already poised for such a shift as a natural part of her mutation into the Psychozoic Era.
- The Psychozoic Era - spiritualization of all of life - is what awaits the Earth following the return of humanity to natural time - 2012-2013.
- We are talking about passing through stages. The Thirteen Moon calendar is just the evolutionary door opening. On the other side of that door in a world of the reformulated human mind is another reality.

2. The Thirteen Moon Calendar and the Tzolkin

- The synchronic order described by the Law of Time consists of layer upon layer of cycles. To learn about these we go through stages of opening up to the different layers of cycles.
- The harmonic perfection of the 13 Moon/28-day calendar makes it the perfect vehicle for encoding the various cyclic dimensions of the synchronic order. This is the real meaning of time as the fourth dimension.
- The fourth dimensional timing gauge is called the Harmonic Module. It is based on the Tzolkin, the key to the Mayan calendar system. As the Harmonic Module the Tzolkin is 13 x 20 (13:20 frequency) matrix consisting of the permutations of 20 icons or solar seals and thirteen numbers called galactic tones. The 260 possible permutations of seal and tone create the cycle of 260 Kin.
- The 260 Kin (day) cycle correlated with the 365 day cycle of the 13 Moon calendar creates a cycle of 18980 days or 52 years during which no two days repeat. This is called the Solar-Galactic Cycle.

- The Tzolkin is a mirror of our relations and ways of behaving in the world
- The Tzolkin clarifies patterns of synchronicities. Once the patterns are known, our alignments or alliances become intensified. First comes the alignment with our own individual destiny.
- The 20 sacred signs and the 13 numbers of the Tzolkin are the destinal guides that monitor the synchronicities of our lives. Every day has: a different sign; a different tone; is a day of the week; and is a day of a particular Moon. This composite of information is how the synchronicities in our lives are tracked and become apparent.

3. Find Your Galactic Signature and Enter the Dreamspell

- By your date of birth you are one of the 260 Kin coded in the Tzolkin. This is called your galactic signature.
- Dreamspell the Journey of Timeship Earth 2013 is the complete description of the codes of fourth dimensional time coded in the Tzolkin. The Dreamspell includes the Book of Kin, Journey Board, Oracle Board and Galactic Compass.
- On the Galactic Compass you can dial up your galactic signature, then find it in the Book of Kin and meditate on it. Your Galactic Signature is the entry to the new culture of time, galactic culture. The galactic signature involves three components: a color, a tone, and a seal, e.g., Yellow Self-existing Star (Kin 108)
- No one else but ourselves can receive as purely as necessary the destinal message of the galactic signature that is meant for us alone. This is only the beginning.
- According to your galactic signature you belong to an Earth family, a color family, a tribe and one of several clans. The Earth family codes your Moon calendar birthday with four different seals, four colors and thirteen tones to create your own 52-year solar-galactic cycle.
- Dreamspell has two aspects:
First it is the interstellar, interplanetary cosmological history of Planet Earth.
Second, it provides the codes for social reorganization - the new dispensation.

- The Dreamspell encompasses a whole set of mathematical codes which are inseparable from knowing Earth as a whole system.
- Based on the coordination of the Dreamspell with the Thirteen Moon 28-day calendar many different levels of the synchronic order can be discovered. the summation of all of the programs of the synchronic order and the Law of Time are known as The Dynamics of Time.
- The Dynamics of Time demonstrate that the evolution of time is the evolution of consciousness.
- Through knowledge of the synchronic order and the Dynamics of Time we will be able to develop the power of sensory teleportation, and then the capacity for time travel.

4. Understanding the Wavespell of Time

- The Wavespell is any cycle of thirteen - thirteen days, thirteen weeks, thirteen moons, thirteen years, etc.
- A Wavespell corresponds to the thirteen tones of creation.
- These thirteen tones of creation show the progression of life in interconnected stages.
- Each tone presents qualitative and numeric meaning in itself, and in relationship to the other tones.
- One year equals a Thirteen Moon Wavespell (Thirteen Moons with 28 days each).
- A Thirteen Moon Wavespell is also known as a Planetary Service Wavespell.

- Each year of Thirteen Moons can be divided into four perfect quarters of thirteen weeks each. These thirteen weeks are also known as a wavespell (remember a Wavespell is any cycle of thirteen).
- Rather than January, the first moon on the 13-Moon, 28 day calendar is the Magnetic Moon. The Magnetic Moon is always correlated with the Gregorian date July 26 (rather than January 1). So the first day of the year is Magnetic 1.
- The first day of the new year Magnetic 1 will always fall on one of four solar seals: Yellow Seed, Red Moon, White Wizard, or Blue Storm. Each of these will always be combined with a tone. For example this year is Red Planetary Moon, but starting July 26, 2003, it will be White Spectral Wizard. The year after that will be Blue Crystal Storm. And the year after that will be Yellow Cosmic Seed. Then back to tone one, Red Magnetic Moon.
- Years occur in four year groups known as Seed-Storm Year Bundles. Thirteen of these four-year bundles equals 52 years. A 52-year cycle is also be called one Solar Galactic Cycle.
- In one 52-year Solar Galactic Cycle there are four thirteen year cycles. These cycles are called Seed, Moon, Wizard and Storm. During any one of the four cycles, the first, fifth, ninth and thirteenth years of that cycle will also fall on the same solar seal. Example: We are currently in 13-year seed cycle which began in 1993 in the Magnetic Seed Year and will close out in 2006 when we complete the Yellow Cosmic Seed year.
- This is sufficient to get you going in your living of natural time and practice of galactic culture.

PROGRAM C

After the Calendar Change: The Rainbow Bridge, Telepathy and Time Travel

By its being a function of the Law of Time the calendar change will benefit the individual, groups, and eventually all of humanity in infinitely expansive ways.

- Just to promote the calendar change requires human unification and synchronization!
- Simply by synchronizing humanity to a harmonic standard through use of a harmonic measure (vs. an irregular measure) the mind will become predisposed to harmonic perceptions.
- Once we are living in natural time, the increase of perception of harmony and harmonic order will evolve new values of organic simplicity.
- Synchronicity will become the norm and telepathy will be understood as a prime human capacity to be cultivated.
- The increase in synchronization, the rise of harmonic values, evolving lifestyles of organic simplicity webbed together by telepathy will easily bring about a peaceful unification while enriching the cultural diversity of human society.
- A daily recognition of the patterns of nature will bring about environmental harmony and increase awareness of natural time and rhythms of nature.
- The reestablishment of the harmony of human with nature (the biosphere) will stabilize the Earth changes.
- Understanding time as the synchronic order will open doors to new domains of scientific enlightenment.
- Personal attunement with the natural order will result in increasingly enhanced psychic power.
- Rebalancing feminine cycles and restoration of gender balance will greatly improve the quality of human relations and reaffirm the feminine aspect of human culture.
- Realization of Time as the fourth dimension will liberate the imagination into Technicolor splendor.

- Understanding time as the evolution of consciousness, we will understand how consciousness is held in the solar ring. Because of this we will see the relation between time, telepathy and time travel.
- The new paradigm of time, telepathy and time travel will become humanity's next sacred challenge. The synchronization of the human mind with the natural order will make possible unsuspected wonders - like a Rainbow Bridge around the Earth!
- Please Note: Mayan time masters knew how to meditate and put the knowledge into the planetary mind. The Mayans foresaw the time in which we now find ourselves. They knew that Calendar Reform is the final act of history, and the first step toward Earth regeneration in the cradle of galactic culture.
- The 13-Moon, 28-day calendar is the key they left for present day humans to remember their galactic inheritance and change the course of history before the closing of the Mayan Great Cycle in 2012!

Calendar Change, July 26, 2004, Blue Crystal Storm.

Our one great opportunity to enter the interdimensional portal of time leading to 2012.

If we can arouse a critical mass to make this Change,
 then the Mayan miracle of time will have been realized.
 An awakened humanity will write an enlightened conclusion to the cycle of history -
 making it the gateway to a new spiritual evolutionary future.

Learning swiftly
 May you evolve with grace and ease
 into the magnificent galactic being you have always been!

From the One
 Return to the One
 In the New Time
 Always Now

Critical Self-Study Questions.

1. What is a calendar?
2. What is the effect of a calendar?
3. What is the meaning of 12:60 frequency?
4. Why is the natural time frequency called 13:20?
5. What is the Synchronic Order?
6. What is the Law of Time?
7. What and when is the Calendar Change?
8. What are benefits of the 13 Moon calendar over the Gregorian?
9. What is a Wavespell?
10. What is the Dreamspell?
11. What is a solar-galactic cycle?
12. What is a galactic signature?
13. What is the solar ring?

Declaration of the First World Peace

We, the people of planet Earth who have chosen to follow the Thirteen Moon/28-day calendar as the basis of a new sovereignty and a new community of peace and harmony with all of life on Earth, in rejecting the old calendar and its disempowering institutions, do hereby declare the commencement of the First World Peace.

The purpose of the First World Peace - 2004-2012 - is to declare Earth as a universal cease-fire zone thus assuring the time for a comprehensive reordering of human priorities with the end of sustaining and furthering all of life as a single unity on this Earth. To attain this goal, we do hereby declare and establish our sovereignty in a New Time of perfect harmony, and in so doing, are no longer bound to the institutions and mores of the old time and its calendar. We solemnly dedicate ourselves, instead, to a new beginning with fresh, creative ways of solving our problems. War is no longer in any way a viable form of conflict resolution, and in its place we call for a universal disarmament accompanied by a reorganization of human society in accord with the constructive peace and harmony reflected in the new calendar of Thirteen/Moons 28-days.

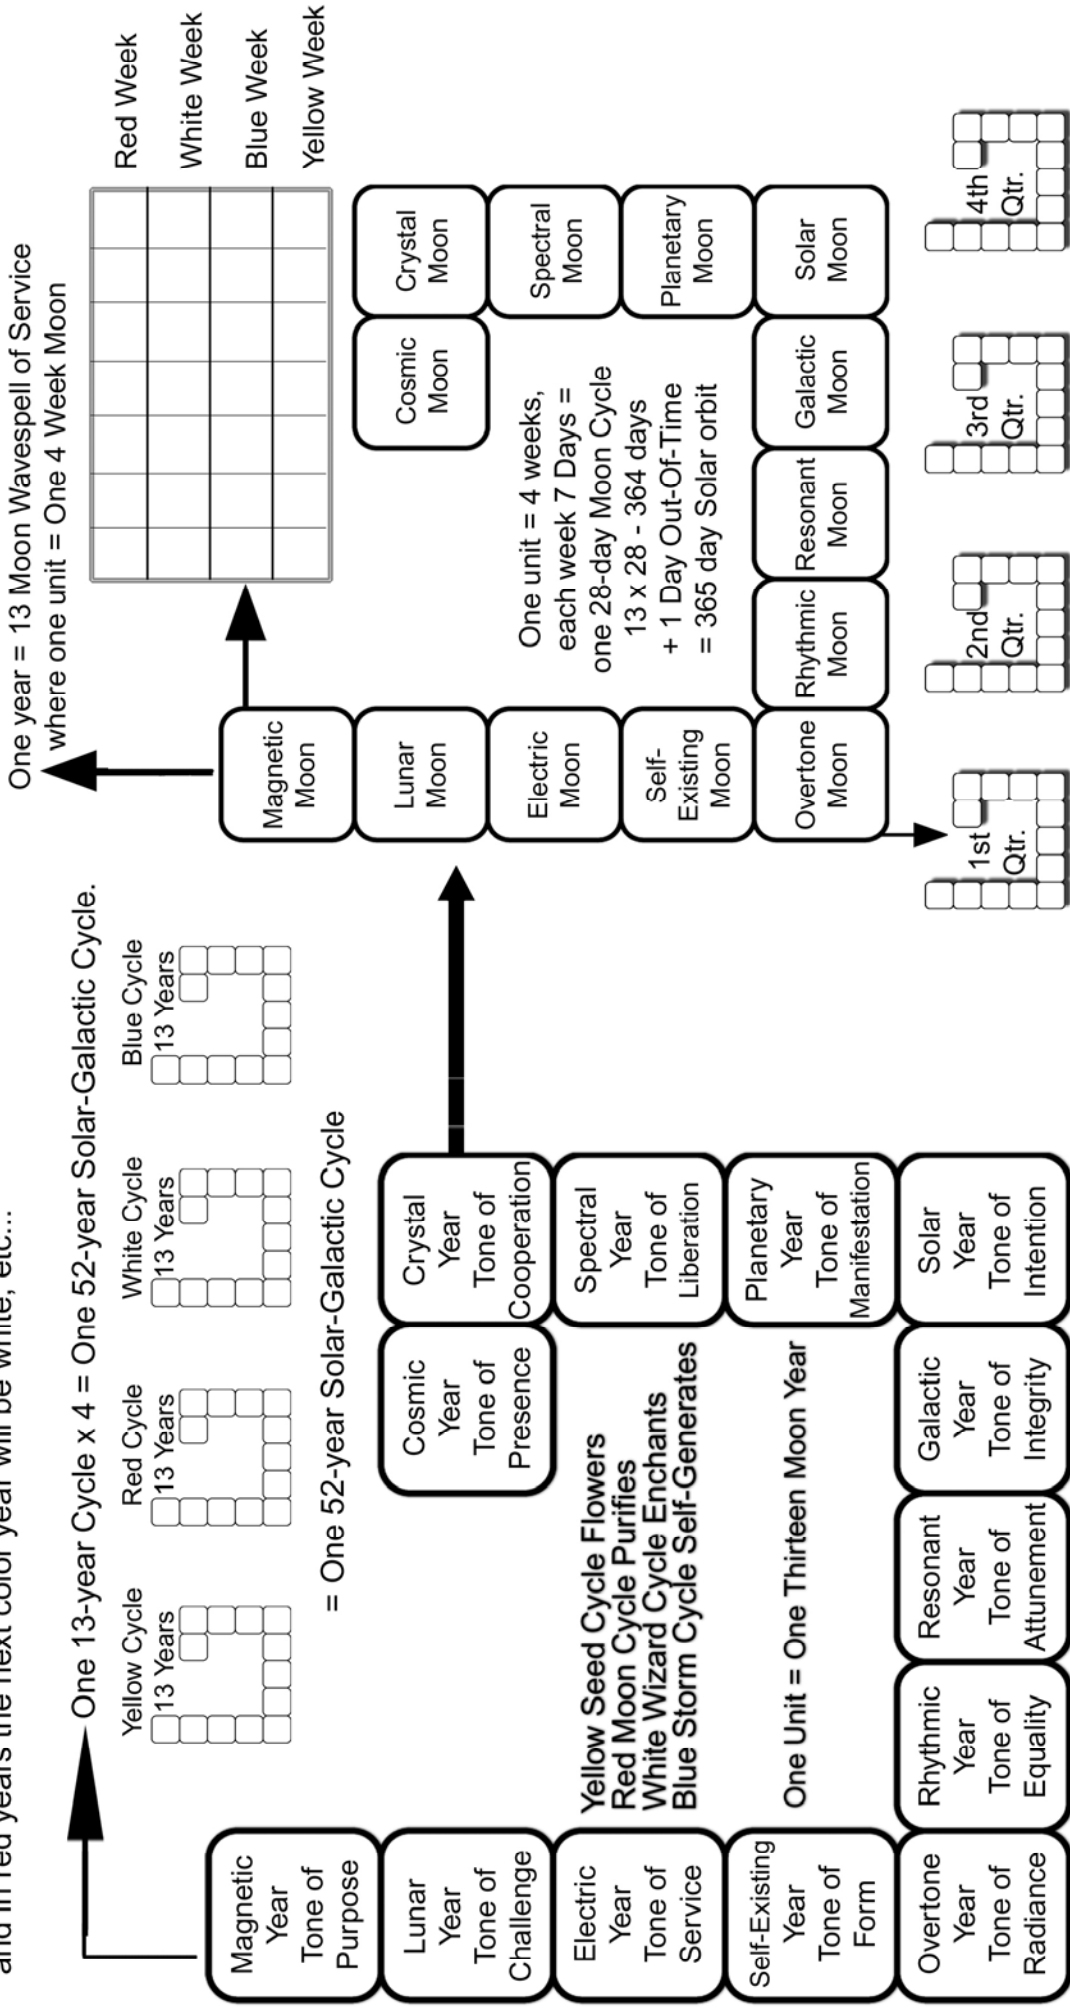

In making this declaration of the First World Peace we call upon all existing humanitarian organizations to join us in creating a New Assembly of the Earth which will first of all assist in making the change to the new calendar and the new time among all peoples of the Earth. Simultaneously, the New Assembly of the Earth will call upon representatives of all peoples to gather to establish the new priorities and to prepare for a universal understanding of time as the basis of a new Global Civilization.

We who undertake this heroic adventure do so only after having seen and experienced the exhaustion of the old order embedded in a calendar whose time no longer served the purposes of universal spiritual and mental evolution. We pray to the Supreme Creator that our task will be guided by Divine Mercy and that Compassion and Enlightenment will befall the upholders of this Declaration. May we have the courage to dissolve all of the old that is furthering division, strife and destruction. May we equally have the wisdom to preserve that which will in every way continue to uplift the human species. Above all, may we have the patience and tolerance to define and promote the new ways of life that will be in accord with the maintenance and evolution of our Earthly support system, the biosphere, and which will foster a spirit of universal acceptance and tolerance among all human beings.

We understand that if we do not now take these measures we are forfeiting the greatest opportunity that is afforded by changing the time through changing the calendar, and that is to declare an immediate peace that is the expression of the will of the untold billions of humans whose choice is not war but peace. May the voice of the people of the Earth be heard in all tongues echoing in all the valleys of the Earth, blown by all the winds across the seven seas to the highest mountain tops: Let the New Time of Peace prevail for seven time seven generations to come!

WAVESPELL - FRACTAL FORM CONSTANT OF GALACTIC TIME

One Thirteen Year Wavespell Cycle: Four Cycle Types: Yellow Seed, Red Moon, White Wizard, or Blue Storm Cycles where the Magnetic, Overtone, Solar and Cosmic Years are coded by the symbol that gives the Cycle its name. No matter which symbol begins the year, color sequence always reflects the same order: red, white, blue, yellow. For red years this sequence remains the same, for the other three types, in white years, the next year will be blue; in blue years the next year will be yellow; in yellow years the next year will be white, etc...

One Thirteen Unit Wavespell

| 22 | 23 | 24 | 25 | 26 | 27 | 28 |
| 7/18 | 7/19 | 7/20 | 7/21 | 7/22 | 7/23 | 7/24 |

Proposed Calendar:
13 Moons of 28 Days, plus one day.
Galactic, Solar, and Lunar measure;
synchronizes with
Heliacal rising of Sirius on July 26,
364+1 day Solar year,
and 13 Lunar orbits per year.

"Day Out of Time" free day
for celebration, observed globally
for over 10 years, is neither
a day of the week or month.

Earth Celebrations: Mainstreaming the Planet. Archives From 1989

Various articles on Harmonic Convergence. 1987.

It's 1989, twenty years after the first photographs of the Earth arrived from American astronauts on the moon.

Inspired by its powerful image, **thirty-year old Jose Argüelles**, then a UC Davis art history professor, helped initiate the first Earth Day celebration on April 22, 1970.

Since then, numerous earth-based ecological movements and organizations have rallied on behalf of the environment to raise the mass consciousness to planetary issues.

In August of 1987, Argüelles spearheaded the **Harmonic Convergence**, a world wide ceremony engaging the awareness and participation of millions....

Antero Ali: Directly following the **Harmonic Convergence**, a dark period ensued where enthusiasm died

out and left people wondering...How did the

"post-convergence dead zones" effect you?

Jose Argüelles: For myself, after the Convergence all I wanted to do was find a cave and do my breathing exercises. You see, it caught on way past my wildest dreams and so, that's a tremendous release of energy. I just had to take it easy afterwards. In any case, my son Josh was killed on October 29th that year; he was eighteen then. And so, I wanted to go in a cave anyway. We did a 49-day retreat after his death. I'm still pretty much in a state of shock and grief so, Lloydyne and I pretty much stayed close to the ground until just recently.

Antero Ali: On a collective level, it really feels like we're between stages...

Jose Argüelles: I get that feeling too, like we're between worlds. We're between the world of Ronnie Reagan and George Bush, on one hand, wondering if the *American Dream* is going to hold up or what...

I think lots of people are experiencing this thing of being caught between worlds right now. Since most people are still "wage slaves" there's the quandry of showing up at this big party like the **Harmonic Convergence** and then having to arrive at the office the next morning. For a lot of us, it's hard to cope with that kind of adjustment.

Yet, the world keeps moving on and people really don't know what to do...

Antero Ali: It seems as the Earth's vertical emanation grows stronger in our awareness, the more horizontally-identified entities like governments, big businesses and such collapse unless they're aligned with the planetary intention.

Jose Argüelles: That's absolutely correct. We're definitely in a transition of indecision, collapse, chaos, and more

indecision while something else emerges...

Antero Ali: What's working for you as a creative response to all this chaos...

Jose Argüelles: What I ended up doing from the time of Josh's death in October of 1987 to the beginning of December 1988 was pretty much nothing. I didn't do anything except to attend to business at hand day by day. What each day needed to have done, was done and very little else. I also remember not looking for anything not seeking for anything beyond the immediate work at hand. There were a couple of slogans that did come up during this period, like: "Don't be foolish enough to believe other people's projections of you" and "Everything takes care of itself." Other than that, it was just tending to my own business.

Antero Ali: You mentioned the time period between 1988-92 as being crucial to your vision of the [Campaign for the Earth](#). Recently, the American people elected ex-CIA director George Bush to govern us with his visions during this same time. How do you see these two visions coinciding and/or colliding with each other?

JA: My feeling is that this is going to be the last presidential administration as we know it. Mr. Bush is in a position where he can either continue to go in the direction we've been going in over the past decade or so, like greater involvement in the world drug wars and military sales, the crime cartels and all that.

Now this is a very big and bizarre ball game where the United States government has gotten itself into a position of actually competing with other governments and international crime cartels.

Or.. Bush could start hearing what's going on environmentally and pick up some cues to do something about it as the head of this nation state called America. **He might, for instance, send battalions of troops with picks and shovels to restore ruined land masses...**

It's hard to say but I think if he goes in the former direction, he's a dead duck...

The tenure and nature of the events occurring over the next couple of years is going to force some real hard decisions about what's actually going on in the world. The reality is that the nationalistic approach is really a destructive one at this point the way nation states are set up right now.

You see, the atmosphere doesn't know boundaries, the weather doesn't know boundaries and, the ozone doesn't know boundaries. **The level of cooperation that's going to be necessary to deal with all this** is showing us now that the present nationalistic government approach is quite obsolete.

AA: The late Joseph Campbell stressed repeatedly of the need for a new collective mythos to help people organize their lives around a common vision and purpose. What part does the planetary entity, the Earth, play in the emergent mythology?

JA: I agree with Campbell on that. In 1969, we had the first trip of a man to the moon and the first photographs of the Earth sent back to us from the lunar surface... It is a very powerful image and the basis for what I believe Campbell calls the new mythology. Allen Ginsberg once said, "Whoever controls the image, controls the mind." Even though we've had this image of the Earth for twenty years, the people who've controlled the images have not understood or used it or have not wanted to understand how to use it. As a consequence, we're not totally up-to-speed with this image... The next step is really embedding this image of the whole Earth into the collective mass consciousness.

The unconscious has to become conscious through articulation in other words, and the Earth has suddenly come back into prominence...

We're looking for ways to mainstream the planet.

AA: This is the selling of the Earth, isn't it, Jose?

JA: Like I said, Antero, mainstreaming the planet is where it's at now. In regards to this, we've a lot to learn from the skill and effort used to sell Coca Cola, Proctor & Gamble, and the lot... Twenty years ago the environmental movement was there but it was never coherent in a global sense. Military issues seemed to be more critical back then. **Now, the Campaign for the Earth is the moral equivalent of world war. We need that right now...**

AA: How exactly are you going to accomplish this necessary shift in people's attitudes and thinking about the Earth to make it normal to celebrate the planet?

JA: I think that will come about through an economic shift, specifically from an economy of efficiency to an economy of sustainability. Our total throw-away culture, which was produced by the industrial age, is a prime example of what I mean by "efficiency." When mass production of commodities, at the greatest possible speed, uses up natural resources with little regard for toxic side-effects and waste material, well, we end up with what we have now -- an environmental emergency. Now, we don't have much time to make this shift into an economy of sustainability...

What I mean by "sustainability" is where technology serves to improve the quality of life by fostering creativity instead of non-stop consumption of non-renewable resources.

This can be achieved by "**linking**" rather than "ranking" our concerns with those of other people and those of the Earth. What it is, really, is **a shift in values from standardized mass production to individual and collective creativity**. Five hundred years ago a cultural renaissance exploded in Europe... I think everybody's ready for it.

THE BANNER OF PEACE

The Roerich Pact and Banner of Peace is an international treaty signed by India, the Baltic states, and 22 nations of the Americas including the United States. The Roerich Peace Pact established an international agreement allowing any nation to protect its cultural or artistic heritage with a symbolic banner, the Banner of Peace. Signed in 1935, this treaty is international law today.

Nicholas Roerich, shocked by the devastations of World War One and the Russian revolution in his own country, realized that the cultural heritage of each nation is in essence a world treasure. His idea of cultural heritage included not only the physical remains of earlier cultures, but also the active creative centers, universities, libraries, concert halls and theaters of all nations. Just as the Red Cross protects hospitals, the Banner of Peace was implemented to protect culture.

Written with the assistance of international experts and lawyers, the Banner of Peace was praised by many notable figures during its signing including Albert Einstein, George Bernard Shaw, and H.G. Wells. The Pact states, "educational, artistic, and scientific institutions... shall be protected and respected by the belligerents ... without any discrimination as to the state allegiance of any particular institution or mission... these missions may display a distinctive flag (the banner of peace).. which will entitle them to special protection and respect..." Thus any site of cultural activity around the world can fly the Banner of Peace to declare itself neutral, independent of combatant forces, and protected by international treaty.

Roerich was an artist and travelled extensively through Russia, India, Tibet, and the United States. He hoped by using a symbol that represented all cultures no group would feel excluded from using it. The Banner would have not one but several meanings, as Nicholas Roerich himself wrote *"Let us be united - you will ask in what way? You will agree with me: in the easiest way, to create a common and sincere language. Perhaps in Beauty and in Knowledge."*

The distinctive Banner, shown above, is three red circles surrounded by a larger red circle on a white banner. The banner is a deep red or magenta color to symbolize the color of our one blood, which is the same for all peoples. The top circle represents spirituality and encompasses the truth of all religions, that we can all unite regardless of our distinct beliefs. The two circles on the bottom represent art and science. The circle that surrounds the three spheres represents culture, the unity of art, science, and spirituality.

The symbol for the Banner of Peace can be found in many cultures and numerous philosophical systems. It can be found on the coat of arms of the Popes, on Ethiopian and Coptic antiquities, and stone age amulets. It also appears on Tibetan rings, Buddhist banners, the Temple of Heaven in Peking and in the oldest of Indian symbols, the Chintamani, the sign of happiness.

Found in all cultures, the Banner of Peace is the perfect symbol to bring all peoples together in peace.

Quotes of the originators of the Banner of Peace

In the chain of creation each manifestation becomes relatively passive or active, giving or receiving. Cosmos affirms the greatness of woman's creative potential. Woman is a personification of nature, and it is nature that teaches man, not man nature
- Helena Roerich

Where there is Peace, there is

<< [back](#) :: [home](#) <<

*Culture;
Where there is Culture, there is
Peace.
- Nicolas Roerich*

According to Native American legend, when the original people began to fight among each other, Kitchi-Manitou (the Great Mystery) decided to purify the Earth by water.

Only one man, a few animals and birds were left after the great flood. Man was left stranded, alone in the great ocean, holding on to a tree trunk.

Turtle, seeing man's predicament, let man step on him. Supporting all living creatures, Turtle became an island, the Americas.

Separated by language and national borders, this land is rarely thought of as a single living entity, yet it is.

tortuga.com is dedicated to the realization of this truth.

13 Moon Calendar Tutorial

I Ching and DNA Tutorial:

Part One. The
Genetic Code.

Part Two.
The I Ching and
Book of Changes

The Law of Time is the union of art, science, and spirituality.

The harmony manifested by time as cosmos - which literally means "order" - gives rise to the great and simple formulation of the Law of Time: $T(E) = \text{Art}$; Energy factored by Time equals Art. This means that energy, any manifestation of the physical three-dimensional world, possesses order and is in harmony with its environment because it is factored by time.

This brief web tutorial describes DNA and how it pertains to the Chinese I Ching and the Law of Time.

For some, the scientific part may be very introductory material, for others this could all be completely new. If you don't want to skip to the I Ching section you can use the navigation bar to go forward any time.

Why are there no leap year days?

As many have noted, February 29 is not counted as a day of the week in the thirteen-moon calendar.

Why?

Currently the Earth orbits the sun in 365.2421896698 days.

Some astronomers and scientists maintain that the Earth's rotation (the day/night alternation) is not a constant and therefore the length of the solar year can change.

This means the idea of a fixed leap year doesn't work.

Even the best astronomers are not in agreement as to the exact measurement of the solar year.

It is this .2421896698 fraction of a day that the leap year day accounts for.

Realistically speaking, the Earth does not go around the sun in 365 days some years and 366 days in other years.

The leap year day keeps the current calendar from slipping in regard to the seasons. If no leap year day was kept spring would come earlier and earlier in the year.

The pyramid of Chichen Itza has 91 steps on each side, a total of 364 plus the tower, equals 365.

$$91 + 91 + 91 + 91 = 364 + 1 = 365$$

Same as thirteen moon calendar

$$13 \times 28 = 364 + 1 \text{ Day-Out-of-Time} = 365$$

So how did people figure out Leap Year days long ago?

Ancient peoples made temples or pyramids where light would shine either on the Equinoxes or the Solstices. This insured that their calendar was in synch with the seasons.

The pyramid of Chichen Itza is one of many examples of this style of architecture, where a serpent appears along the steps on Spring Equinox.

There are many examples of this type

of architecture among many different cultures around the world.

Many cultures recognized long ago that the Earth did not follow a precise 365-day year, but there are many different ways of solving this "problem" besides a leap year day.

Instead of having February 29 every four years, why not have a thirteen-day Wavespell-Out-of-Time every 52 years?

Every 52 years there are 13 leap year days.

Instead of having an extra day on February 29 every four years, these days would be celebrated at the end of 52 years as thirteen Days-Out-of-Time.

These thirteen days would be a Wavespell-Out-of-Time, like the Day-Out-of-Time on July 25, but an entire

thirteen week Festival of Peace through Culture.

Currently, since Leap Year is observed, each leap year observed takes one day out of the thirteen-day Wavespell-Out-of-Time ([a more in-depth look here](#)).

So!! Why don't you just keep February 29 like everyone else?

February 29 is an arbitrary day... Why isn't it December 32?

The reason it is February 29 has to do with the imperial ambitions Julius Caesar, not science or astronomy. *([Read more about the history of February 29 here](#))

Keeping February 29 would throw off the harmonic perfection of the thirteen moon calendar!

In the current twelve-month calendar Sunday, April 01, 2001 in 2002 becomes Monday, April 1 then Tuesday April 1, 2003 and then Thursday April 1, 2004.

There is no easily recognizable system for what a day will be a year ago or a year from now with the current twelve-month calendar.

In the thirteen moon calendar Sunday, April 01, 2001 is the 25th day of the 9th moon, on Alpha, or the 5th day of the week. A year from now it will still be the 25th day of the 9th moon, on Alpha, the 5th day as it will be a thousand years from now.

That is because the thirteen moon calendar is perpetual and harmonic.

If you are familiar with the Harmonic module, there is an even deeper reason why February 29 cannot be counted ([which you can read more about here](#))

So Leap Year isn't counted... but the sun rises, it is a day isn't it? I Still Don't Get it!

Yes, it is a day, but it is not a day of the week, nor does it have a Solar Seal. It is a void day, 0.0 Hunab Ku.

February 29 is completely arbitrary, a day to make up the .2421896698 of a day difference between the 365 days of the year and the actual amount of time the Earth takes to go around the Sun.

This assures that the seasons are always more or less at the same time of the year (*ever noticed how sometimes Spring Equinox is March 21 and sometimes March 22?*). This is due to that .2421896698 of a day fraction.

There is scientific evidence that the Earth's rotation on its axis is slowing down due to global warming.

If the day becomes just one minute longer, there would be no need to add days to the calendar, as the Earth would go around the sun in exactly 365 days.

For more information see [global warming's effect on year length](#) (outside webpage)

13 Moon Mayan Dreamspell Natural Time Calendar

Kip Ox Oc and fellow timeship explorer Raphael Vaxac Cib
 have been dedicated to the creation of a 13 Moon Dreamspell Calendar
 in British Columbia, Canada since the year of Blue Galactic Storm.

Synchronometer.com

The Day synchronometer is a way to keep track of the day according to the same principles that the Maya used to count their days. It uses 20 tribal hours, with the first tribal hour starting at sunrise. The mathematical perfection of the Tzolkin can also be found within the day synchronometer, and in fact, the synchronometer can be used as a model for understanding the timing of the inner planets of our solar system.

| ABOUT THE THIRTEEN MOON CALENDAR PEACE PLAN |

The Complete Guide to the First Planetary Congress of Biospheric Rights

Within the planet's biosphere the human species, operating within artificial and mechanistic timing devices, is the only species out of phase with the biosphere, and, therefore in violation of the unifying law of natural time. Presented and formalized in Brazilia, Brazil, 1996, the new covenant and resolutions of biospheric rights is ground-breaking in scope and reach in socio-political reform.

1996, PAN. *Out of Print.*

[Online version.](#)

| TOOLS |

Dreamspell: The Journey of Timeship Earth 2013

Earth, it's not a spaceship, but a timeship. This break through educational game format provides complete proofs of the radial matrix of fourth-dimensional time, and includes tools such as the Galactic Compass for translating any date on the 365-day, solar-lunar calendar into the galactic, fourth-dimensional timing cycle of 260 days. This tool kit and set of proofs was always intended as a gift for all of humanity, never to be

commercially sold. 10,000 English and 10,000 Spanish kits were produced and given away, 1991-1992. In addition many groups in Latin America, North America, and other parts of the world are now following the Thirteen Moon Calendar. 1992, *Interlink Productions*.

[CLICK HERE!](#)

Telektonon: The Game of Prophecy

The Telektonon demonstrates that every 28 days, thirteen times a year, is a path of knowledge and telepathy that leads beyond history and takes us from the third to the fourth dimension. Accompanying this game which establishes the new cosmology of time and science of telepathy, is the prophecy of Pacal Votan (AD 603-683). The wisdom of the Mayan sage encompasses all religion and specifically refers to the renovation of the biosphere during the last seven years of this century through the first thirteen years of the new Millennium. 1995, *Interlink Productions*.

The 20 Tablets of the Law of Time

This body of information is designed to be explored as a 16-year meditation/study practice that activates conscious DNA evolution by aligning with a new dispensation use of the 64 I-Ching hexagrams. The 20 Tablets reveal a harmonious, radial pattern which links past, present, and future, holding guidance for humanity's emergence into the New Creation. Illustrated 11x17 tablets come with a 128 page instruction manual. 1997, *PAN*

Rinri Project

Rinri means "Ethical Enlightenment."

The Rinri Project is 1. the informed application of advanced synchronometry disciplines coordinated by the Law of Time, and 2. didactic articles for the purpose of Universal Ethical Enlightenment.

The 260 Postulates of the Dynamics of Time

This is a volume of meditation on the nature of celestial harmonics, time travel, and the higher levels of organization of 4th-dimensional time. Divided into 20 chapters of 13 postulates, each postulate correlates to one of the 260 kin of the Tzolkin. An excellent tool for daily synchronization with deeper layers of the Tzolkin, as well as a philosophical reference on the Law of Time. 1997, *PAN*.

| CLASSICS OF THE IMAGINATION |

Surfers of the Zuvuya - Tales of Interdimensional Travel

Zuvuya is the Mayan term for the big memory circuit... the memory hotline. It works individually and collectively. Most importantly, it connects equally to the future as well as the past. The Zuvuya is the interdimensional thread. The Zuvuya is the wave, and to surf this wave is to be at the dynamic crest that interfaces our 3rd-dimensional physical reality with the reality of the 4th-dimension. *1989, Bear & Co.*

The Arcturus Probe

Tales and Reports of an Ongoing Investigation

Arcturian involvement with our system began over three million years ago when a space colony, a galactic way station, was established on Velatropa 24.4, otherwise known as Mars. Explore the tales of the Arcturus

Probe through the transmissions of the Mars experience to the neighboring blue planet, Velatropa 24.3 - Earth, where a more cautiously and intelligently supervised "repeat performance" would be played out in a continuing investigation of which we are all a part.

1996, Light Technology Publishing.

The **Foundation for the Law of Time** is a non-profit organization, 501(c)(3) registered in the state of Oregon whose purpose is the promotion and fulfillment of the World Thirteen Moon Calendar Change Peace Plan and all aspects of the law of time. All of the educational material made available through the Foundation is for the peaceful and creative restoration of the human species in natural time.

13 Moon Calendar

| | | | |
|---|--|---|--|
| Moon 1 - 28 Days  | Moon 2 - 28 Days  | Moon 3 - 28 Days  | Moon 4 - 28 Days  |
| Moon 5 - 28 Days  | Moon 6 - 28 Days  | Moon 7 - 28 Days  | Moon 8 - 28 Days  |
| Moon 9 - 28 Days  | Moon 10 - 28 Days  | Moon 11 - 28 Days  | Moon 12 - 28 Days  |
| Moon 13 - 28 Days  |  + 1 Day-Out-Of-Time Day of Planetary Peace Through Culture Festival | | |

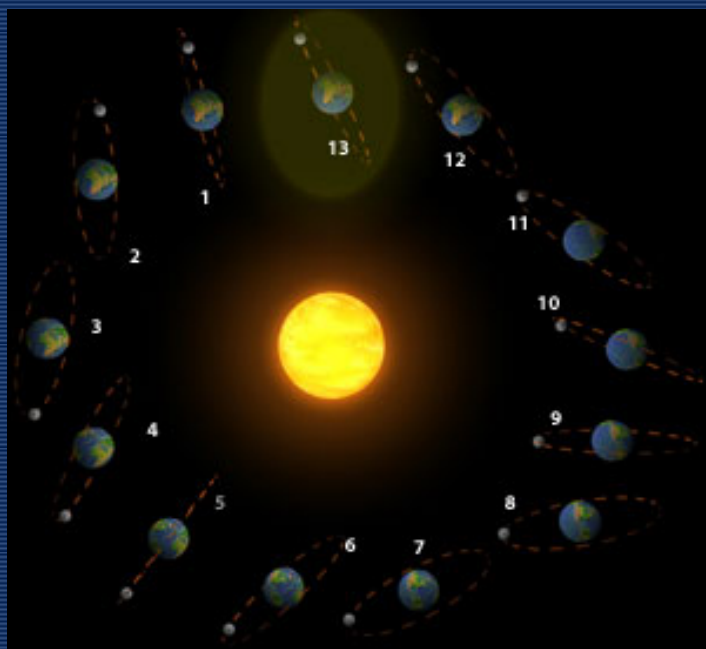

Regular - Harmonic

Of all the unexamined assumptions and criteria upon which we base and gauge our daily lives as human beings on planet Earth, by far the greatest and most profoundly unquestioned is the instrument and institution known as the Gregorian Calendar.

We all have to assume the attitude of knowing nothing. In this way we can learn.

I don't think you can find a university that teaches the science of time. We have many courses in the science of space but you will not find any courses on the science of time. This in itself tells you something. We are space bound and time ignorant. This is a natural point that we have arrived at in our evolution. We know how to send tin cans in space, but we do not really know how to enjoy time. When we have spare time many of us want to kill it ... how do we kill time? That means developing something that takes you away from thinking.

We see that we are touching a topic that is very profound, that extends to every aspect of our being. When we begin to understand it we are actually entering into a new stage of evolution. Space is physical, so naturally we have a materialistic civilization. Time is mental, of the mind. So that when we begin to understand time truly, we will be participating in a phase of evolution that is mental and spiritual.

When it comes to the human society, to express the order of time is the function of what we call a calendar. Usually we say that a calendar is an instrument for the measure of time, so why do we need to do this? The reason we need to do this is that we represent a point in evolution in which what was unconscious will become conscious, and the calendar is an instrument that participates in that process. We know that trees internally embody their calendar, and we know that the dolphins and other creatures have their ways of internalizing the calendar as a measure of time. We are that creature which is going from the instinctual and the unconscious to the self-reflective super-conscious. In this process we need to externalize the nature and the pattern of our habits and of our memory in a type of order, so that we can conserve and synchronize our social form. When we have a calendar, for instance the one which is in use today, the Gregorian Calendar, which is really the calendar of the Catholic Church or the Vatican, you see that every single day has a saint associated with it. That is an example of using the calendar to conserve a type of memory so that the social form can be maintained.

But we also know that when we look at this (Gregorian) calendar as an instrument of measure, there is something wrong with it. As we have pointed out many times before, this calendar does not have even units of measure. If we have an instrument of measure where the units of measure are not even, when you apply that instrument of measure you are going to create unevenness or crookedness. So we can say that if time is of the mind, then the instruments of time that we use establish mental orders appropriate to them. In other words, the Gregorian Calendar creates an uneven and crooked mental order. And because of this we can maybe have some idea of why we choose crime over utopia: there is nothing in the conditioned sense of time that follows this calendar that leads to harmony; so this is the very critical point, and we have to think about that very deeply in order to understand that, to make sure that we understand that.

12 Month Gregorian Calendar

Irregular - Disharmonic

If you have an uneven standard of measure, the uneven standard of measure is programmed in your mind. It is like creating a social order that has frustration built into it. That frustration creates different social forms, which also never arrive at a full achievement. So the society of the primitive culture of present day Earth seems to create a lot of noise, but in terms of the actual human satisfaction-that level diminishes. So we keep coming back to the present moment, on this planet today, where there are six billion humans, who are dissynchronized, dominated by a culture which uses a calendar that makes the mind crooked. This dominating culture is in the process of making things even more dissynchronized. In chemistry there is a state called "brownian motion", in which you see that all the particles are agitating. But they don't create a form of order. So six billion humans are all agitating, but they cannot create a whole consistent form of order that makes them happy. We can think of these six billion humans as little filaments of iron that are being agitated. And when we talk of the Law of Time, the Law of Time is a magnet to put into the six billion agitating filaments. When you put that magnet in, then all the filaments go into order.
